

# NimbleNova job opportunities

Are you ready to pioneer in the field of federated data exchange? We're seeking candidates with an entrepreneurial mindset to join our dynamic team at NimbleNova. We are seeking diverse profiles with a broad orientation, focusing on one of the following specialized areas (T-shaped expertise): advisory, architecture (data-focused), and change management.

## **Our mission**

NimbleNova is a Dutch startup consultancy firm. We are on a mission. We specialize in guiding organizations and government bodies through the complexities of federated data sharing, including data spaces. What drives us is the remarkable shift we're witnessing towards federated data sharing in sectors like logistics, healthcare, and manufacturing. Our goal is to enable data collaboration across and within entities, always prioritizing privacy, compliance, and decentralized control. We're dedicated to unlocking limitless potential and liberating organizations from reliance on major commercial platforms, making digital evolution accessible, even to SMEs.

## **Our values**

We are building a team of like-minded individuals who share our core values: relatedness, autonomy, competence, and nimbleness. Together, we strive to advance federated data sharing and deliver genuine value to communities and organizations. These values guide our work and inspire our collaborative, innovative approach as we explore this dynamic field.

## **Are you willing to dive In?**

As a NimbleNova consultant, you will play a key role within our consultancy projects, collaborating closely with a diverse team of experts and stakeholders. Their competencies span industry-specific expertise, stakeholder engagement, semantic analysis, distributed systems, data infrastructure, change management, transformation strategies, and project management acumen.

Our projects are diverse and includes activities such as:

- ▷ Empathize with stakeholders to uncover potential federated data exchange use cases, gaining valuable insights
- ▷ Develop reference and solution architectures
- ▷ Demonstrate the tangible value of proposed solutions through pilot initiatives.
- ▷ Articulate the rationale and advantages of proposed solutions to stakeholders
- ▷ Execute pilot initiatives that cater to stakeholder needs and preferences
- ▷ Measure and demonstrate the practical value of solutions in practice.

## **Your responsibilities**

Your role will encompass leading interactive sessions and workshops, delivering compelling presentations, crafting comprehensive advise, conducting analysis, and actively managing stakeholders while facilitating decision-making processes. Operating autonomously, you'll need to make informed decisions and solve complex problems. Yet, our ideal candidate thrives in a collaborative environment, embraces feedback, and is committed to self-growth.

## NimbleNova consultant opportunity

### Join us and expand your horizons

At NimbleNova, you'll have the opportunity to deepen your understanding of federated data exchange. You'll effectively communicate and exchange ideas both within our team and externally, leading to the development of practical approaches and solutions that can be applied in real-world scenarios.

### The challenges of a NimbleNova consultant

- ▷ Rapid learning and pioneering in the field of federated data exchange
- ▷ Building and nurturing relationships with diverse stakeholders
- ▷ Ability to understand and articulate the significance of federated data exchange
- ▷ Taking ownership and organizing your work effectively
- ▷ Openness to feedback and collaborative discussions with colleagues and clients
- ▷ Gaining buy-in for your ideas
- ▷ Developing yourself as an authentic and self-motivated consultant.

### Your qualifications

- ▷ Proactive, action-oriented, and entrepreneurial mindset
- ▷ A fast learner with strong self-awareness
- ▷ A minimum of 3 years of relevant working experience
- ▷ A bachelor's and/or master's degree in fields such as business informatics, data, technology, ecosystems, supply chain, business / public administration, or engineering
- ▷ An interest in areas such as data architectures, collaboration between and within organizations, design thinking, ecosystems, semantic web, change and transformation, and data privacy/security
- ▷ Proficiency in both English and Dutch
- ▷ Willingness to travel.

### What we offer

- ▷ Flexible work arrangements (full-time is standard, but part-time can be discussed)
- ▷ Innovative and impactful projects (with international exposure)
- ▷ Be part of a team that stands together, celebrates together, and grows together
- ▷ Autonomy and work-life balance
- ▷ Access to a broad professional network
- ▷ Shared venture in personal development based on a tailored growth journey
- ▷ Flexible mobility arrangements (NS card and generous kilometer reimbursement is standard, but other preferences can be discussed)
- ▷ Competitive startup compensation package
- ▷ A modern digital workspace (including a phone, laptop, and flexible office options)
- ▷ Yearly contract with the intention of transitioning to a permanent contract unless.
